

*Rev 1:6 And He hath made us Kings and Priests unto God and His Father;
to him be glory and dominion for ever and ever.*

Dennis Lee and wife Alison have served God for 25 years on a mission to bring God's witty inventions to the peoples of the world and bring huge prosperity to the Body of Christ for the purpose of spreading the Gospel to all nations. Their ministry is called Kings and Priests Ministries. Revelations 1:6 says He made us to be Kings and Priests. In the Old Testament the Kings destroyed the enemies of God, taking the spoils of war and bringing the prosperity to the Priests of the House of God to do God's work.

In 1978 a well known prophet prophesied that Dennis and Alison would turn the business world upside down with inventions revealed by God, and that the prosperity would be used to spread the Gospel to all nations, through the Body of Christ. Some of these inventions have been even demonstrated for the Congress of the United States of America. Among these technologies is a motor and generator that could end our country's dependence on foreign oil and stop the burning of harmful fossil fuels that kill an estimated 50,000 Americans a year. Mr. Lee was also inducted into the International Inventor's Hall of Fame in 1996 for the technologies.

Over the past 25 years God has been preparing them for the fulfillment of that prophesy. Much like Gideon, they have been given the unction of God to defeat a great foe. God uses the things of the foolish to confound the wise. He uses that which in our minds is impossible, to bring glory to His name and provisions for His people. So that when the victory is won the people will see the glory and majesty of God.

Dennis and his wife are traveling the country sharing their testimony and God's vision to bring unbelievable prosperity to the church for His name's sake. If you would like to have Dennis and Alison Lee come to share this exciting vision, please contact me at the phone number and or address below. You can also visit www.kingsandpriests.net for further information.

DENNIS LEE
Nationally Famous Radio and TV Personality

- **Top speaker on Free Electricity**
- **Founder of Better World Technologies -**
- **Has Own Research Lab with World Class Scientists**
- **Spokesman for the Top Inventors of Free Energy Technologies**
- **Member of the International Inventors Hall of Fame**

Learn About Technologies That May:

- *Produce Free Electricity and Power Automobiles Free*
- Provide the Ability to Disconnect From Central Power
- Free the Public From Ever Paying An Energy Bill Again.

Hundreds of Other Innovative Technologies Include:
Agriculture products that eliminate the need for pesticides
Fire Retardants that can reduce the risk of house fires by 80%
Bioremediation (microbes that eat oil byproducts to clean oil spills)
Noiseless Jackhammer; Puncture Proof Tires;
Explosive Proofing for all fuel tanks;
Laser Camera that can film inside your body through clothes
